

SURFACE CLEANER

Date:03/04/08

Page 1 of 1

Technical Data:

Base	Mixture of solvents
Consistency	Liquid
Specific Gravity	0,75g/mL
Flashpoint	3°C

Product:

Surface Cleaner is a cleaner and degreaser which will ensure that no grease and stains will remain on non porous surfaces such as plastics, coatings and metals before applying sealants based on silicone, polyurethane and MS-Polymers®.

Characteristics:

- Liquid, easy application
- To be used as cleaner on non porous surfaces
- Suitable for silicone-, polyurethane and hybrid sealants

Applications:

Cleaning and degreasing of plastics, powdercoatings and other non porous surfaces before bonding and sealing
Removing rests of uncured sealants

Packaging:

Colour: transparent
Packaging: tin 500mL

Shelflife:

12 months in unopened packaging in a cool and dry storage place at temperatures between +5°C and +25°.

Surfaces:

Type: all non porous surfaces
We recommend a preliminary compatibility test.

Application:

Method: clean cloth
Recommendation: apply with a clean cloth.
Replace the cloth regularly when dirty in order to avoid contamination of the surfaces.
By applying Surface Cleaner the surface is cleaned and degreased prior to the application of a sealant. Leave to evaporate for 5 minutes. Apply sealant/adhesive immediately after evaporation.

Health- and Safety Recommendation:

Apply the usual industrial hygiene.
Wear gloves and goggles.

Remark: The directives contained in this documentation are the result of our experiments and of our experience and have been submitted in good faith. Because of the diversity of the materials and substrates and the great number of possible applications which are out of our control, we cannot accept any responsibility for the results obtained. In every case it is recommended to carry out preliminary experiments.
