

Scaring Devices

DIS002

The **Scarecrow Patrol 2** is a battery powered hand held portable bird dispersal system. It incorporates nine specific distress calls: (Herring, Common and Black Headed Gulls, Lapwing, Starling, Rook, Magpie, Pigeon and Crow) siren, live announcement facility and showerproof carry bag.

The **Bird Xpeller Pro** is a distress call scaring system with a single built-in speaker. It can help to deter small infestations of birds such as Starlings.

The **Super Bird Xpeller Pro** is a four speaker version of the same system. Both Bird Xpeller Systems are supplied with UK and European mains adaptors.

The new **Scarecrow Compact** is a static yet transportable bio-acoustic bird dispersal system. The high quality digitised calls can be pre-set to play fully automatically at random intervals in daylight hours, or 24 hours as required. The units can be powered using mains power, battery power or with a solar panel.

Standard distress calls on Compact are: Herring Gull, Back-Headed Gull, Starling, Rook, Crow, Pigeon. Alternative calls can be provided if required, for which an additional charge will be made. Area of coverage is environment and terrain dependant, but can be 1,000 sq metres. Dispersal angle normally 200°, but an optional slave unit can provide 360° total coverage.

Two kit options available:

DIS050 Scarecrow Compact 240V - Base unit with 200° dispersal angle, complete with 240V mains power supply cable and wall fixing bracket

DIS051 Scarecrow Compact Solar 360 - Base and slave units with 360° dispersal angle, complete with roof mount (pole and base that requires 4 x 450mm² paving slabs to weight in place - slabs not included) and solar power supply (panel and battery)
